

Important Update: Utilization Management (UM) Medication (Physician-Administered Drugs, PAD) That Require Prior Authorization

Alameda Alliance for Health (Alliance) values our dedicated provider partner community. We have an important update we would like to share with you.

Our provider partner satisfaction is a top priority. We are working to improve our Utilization Management and Claims processes to help ensure proper claim payment to our provider partners, and alignment of authorized services. To accomplish this goal, we are reviewing each benefit, and we will be sending you updates, as the information is ready to share.

This communication provides an update on Utilization Management (UM) Medications physician-administered drugs (PAD) codes that require prior authorization for in-network providers. This list is dynamic and may change based on new medicines coming to the market and to improve our health plan services. This does not include outpatient pharmacy services through the member's pharmacy benefit.

Providers should follow billing instructions for non-capitated services, fee-for-service (FFS) Medi-Cal or special programs, as specified in the policy sections of the Medi-Cal provider manuals.

Examples of non-capitated drugs may include but are not limited to:

- Selected HIV/AIDS/hepatitis B treatment drugs
- Alcohol and heroin detoxification and dependency treatment drugs
- Blood factors:
 - Clotting Factor Disorder Treatment
 - Psychiatric drugs

Enclosed with this notice is an updated code-specific list indicating which codes now require prior authorization. **The newly added codes will impact claims with the date(s) of service starting Monday, May 19, 2025, and thereafter.** The list is also available on the Alliance website at www.alamedaalliance.org/providers/authorizations. Please refer to our website for the most up-to-date information about codes or benefits that require prior authorization.

Please Note: For service codes that do not require prior authorization but are associated with a prior authorization required service, there must be an approved authorization on file for the primary service requiring authorization for the associated code(s) to be paid. Associated codes not on the prior authorization list will not be paid separately if the primary service was denied or does not have prior authorization. The Alliance uses code-auditing software for automated claims

coding verification, and to ensure that the Alliance is processing claims in compliance with general industry and Medi-Cal standards.

In addition to the codes, our claims system will validate that the claim received matches the authorization when authorization is required.

The following items will be validated:

- Member name
- Provider NPI
- CPT and HCPC coding
- Date(s) of service is within the authorized range
- Number of units and/or visits
- Place of service matches site of care submitted on the authorization request form
- National Drug Codes (NDCs) approved by the FDA are required on claims submissions
- Claims missing and/or without a matching NDC on a claim will be denied

This update has been validated based on current and published billable coding for 2025.

Thank you for your continued partnership and for providing high-quality care to our members and the community.

Questions? Please call the Alliance Provider Services Department
